

MenuMainState::onEnter

MenuOverState::onEnter

MenuPauseState::onEnter

StateParser::parseState

```
graph LR; A[MenuMainState::onEnter] --> D[StateParser::parseState]; B[MenuOverState::onEnter] --> D; C[MenuPauseState::onEnter] --> D;
```

The diagram illustrates a central function, `StateParser::parseState`, which is the target of three different state enter methods. On the left, three white rectangular boxes are stacked vertically, each containing a method name: `MenuMainState::onEnter` at the top, `MenuOverState::onEnter` in the middle, and `MenuPauseState::onEnter` at the bottom. On the right, a single gray rectangular box contains the text `StateParser::parseState`. Three blue arrows originate from the right side of each of the three white boxes and point towards the left side of the gray box, indicating that each of these methods calls or utilizes the `parseState` function.
