

entt::basic_continuous_loader::assign

entt::basic_continuous_loader::update

entt::basic_continuous_loader::map

```
graph LR; A[entt::basic_continuous_loader::assign] --> C[entt::basic_continuous_loader::map]; B[entt::basic_continuous_loader::update] --> C;
```

The diagram illustrates a relationship between three functions. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'entt::basic_continuous_loader::assign' and the bottom box contains 'entt::basic_continuous_loader::update'. On the right, there is a single gray rectangular box containing the text 'entt::basic_continuous_loader::map'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'assign' and 'update' functions are associated with or point to the 'map' function.
