

entt::meta_ctor::invoke

entt::meta_func::invoke

entt::meta_any::invoke

```
graph LR; A[entt::meta_ctor::invoke] --> C[entt::meta_any::invoke]; B[entt::meta_func::invoke] --> C;
```

The diagram illustrates a relationship between three function pointers. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'entt::meta_ctor::invoke' and the bottom box contains 'entt::meta_func::invoke'. On the right, there is a single gray rectangular box with a black border containing the text 'entt::meta_any::invoke'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'entt::meta_ctor::invoke' and 'entt::meta_func::invoke' are mapped to or handled by 'entt::meta_any::invoke'.
